

Sustainable, Fiber-Based Clip Portfolio for Canned Beverages

Our range of sustainable, recyclable, fiber-based clip solutions for canned beverages includes premium and minimal material options to deliver the right amount of coverage to protect and secure your product through the supply chain while maintaining visibility and offering opportunities for branding.

Removes the need for both plastic rings and shrink wrap

Offers premiumization thanks to high-impact branding

Recyclable packs made from renewable plant-based fiber from sustainable sources

Comfortable to carry thanks to convenient finger holes

Fully integrated machinery solutions

Cans are protected and secured through the supply chain

Sustainable, Fiber-Based Clip Portfolio for Canned Beverages

KeelClip™

- The center keel secures product for dependable delivery and consistent display
- Works on all can styles and sizes in multiple product configurations
- Completely covers can tops clean, improving hygiene
- During application, containers can be precisely oriented for maximum shelf appeal
- Maximum area for high-impact branding
- Runs on our KeelClip™ 1600 machinery system

GripClip™

- Works for all can diameters and heights in multiple pack configurations
- Cans are well protected with the inner clip construction, but can be easily removed once ready to consume
- Lack of a center keel eliminates the need for pressure sensitive glue
- Potential for high-impact branding
- Finger holes make the pack easy to carry and transport
- Fully integrated with our high speed machinery solution

EnviroClip™

- Our minimal material clip solution constructed from a single ply of paperboard
- Free of glue and plastic laminations
- Suitable for standard cans in four- and six-pack configurations
- Integrated finger holes for comfort
- Small footprint equipment, with an offering that can run at a range of speeds, from manual application to high-speed automation
- Multiple variations currently in development
