

# A revolution in circular solutions.

## Introducing OptiCycle™ A breakthrough in foodservice packaging.

Our latest sustainability innovation is here: OptiCycle, our new line of non-PE foodservice packaging. This huge step toward circular packaging provides an alternative to traditional PE- or PLA-coated products—which gives you and your customers more flexibility than ever in reducing single-use food packaging waste.

Created with the Earth's future in mind, OptiCycle can help you meet your sustainability goals and propel us toward a circular economy.

OptiCycle is **more sustainable** throughout its life cycle.

Its water-based coating **requires less energy** to make than plastic or plant-based films.

Its thinner coating performs as well as alternatives **while using less material**.

The coating is designed to separate from the paper more easily and **improve the recycling process**.

**98% of the fiber is recoverable** during repulping.<sup>1</sup>

The recovered material can be processed and **converted into other paper products**.

We're partnering with industry influencers to help **elevate consumer access and recyclers' acceptance levels**.
